OPERATIONS AND TEAM COORDINATION OPPORTUNITIES

Dear Hiring Team,

I am interested in operations and team-coordination opportunities where I can help organise daily work, support customer service, and improve repeatable processes. My background combines retail operations, employee onboarding, live-event delivery, and hands-on development of internal workflow tools.

At Derand Motorsports, I was promoted from Sales Representative to Assistant Manager and coordinated daily store operations, customer interactions, and team activities. At Purple Poppy, I supported store operations and customer service, helped onboard employees, and managed competing tasks in a changing retail environment.

As Event Coordinator and CEO at Basstime Canada, I planned and delivered live events from preparation through on-site execution. I coordinated vendors, logistics, external professionals, and a small team. This work gave me experience bringing separate responsibilities together around a shared delivery deadline.

I also build practical workflow tools and systems. My Auto Calendar Printer automates delivery schedule distribution, my Bike Finder organizes product catalogs, and my deployed Quoridor Multiplayer PWA coordinates real-time state synchronization with automated graph path validation. These projects reflect my focus on reliable systems that reduce friction.

I hold an Electrical Engineering Technician diploma from Algonquin College and bring a customer-focused approach developed across retail, telecom, and financial services. I would welcome the opportunity to discuss how my coordination experience and practical problem-solving could support your operations. Thank you for your consideration.

Sincerely,

Jaidyn Landry
